**Akbary, H.** *See* Holloway, Roach & Akbary

**Akylas, T. R.** *See* Tabaei, Akylas & Lamb

**Ananthakrishna, G.** *See* Puthenveettil, Ananthakrishna & Arakeri

**Arakeri, J. H.** *See* Puthenveettil, Ananthakrishna & Arakeri

**Bowman, J. C.** *See* Tran & Bowman

**Carazzo, G.** *See* Kaminski, Tait & Carazzo

**Chou, J. H.** *See* Wu, Miau, Hu & Chou

**Coullet, P., Mahadevan, L. & Riera, C. S.** Hydrodynamical models for the chaotic dripping faucet, 1–17

**Denier, J. P., Duck, P. W. & Li, J.** On the growth (and suppression) of very short-scale disturbances in mixed forced–free convection boundary layers, 147–170

**Devenish, B. J.** *See* Thomson & Devenish

**Duck, P. W.** *See* Denier & Duck, Li

**Fabre, D.** *See* Sipp, Fabre, Michelin & Jacquin

**Fröhlich, J., Mellen, C. P., Rodi, W., Temmerman, L. & Leschziner, M. A.** Highly resolved large-eddy simulation of separated flow in a channel with streamwise periodic constrictions, 19–66

**Fukumoto, Y. & Hattori, Y.** Curvature instability of a vortex ring, 77–115

**Goldstein, M. E.** On identifying the true sources of aerodynamic sound, 337–347

**Hattori, Y.** *See* Fukumoto & Hattori

**Holloway, A. G. L., Roach, D. C. & Akbary, H.** Combined effects of favourable pressure gradient and streamline curvature on uniformly sheared turbulence, 303–336

**Hourigan, K.** *See* Sheard, Hourigan & Thompson

**Hu, C. C.** *See* Wu, Miau, Hu & Chou

**Jacquin, L.** *See* Sipp, Fabre, Michelin & Jacquin

**Kaminski, E., Tait, S. & Carazzo, G.** Turbulent entrainment in jets with arbitrary buoyancy, 361–376

**Lamb, K. G.** *See* Tabaei, Akylas & Lamb

**Leschziner, M. A.** *See* Fröhlich, Mellen, Rodi, Temmerman & Leschziner

**Li, J.** *See* Denier, Duck & Li

**Mahadevan, L.** *See* Coullet, Mahadevan & Riera

**Mellen, C. P.** *See* Fröhlich, Mellen, Rodi, Temmerman & Leschziner

**Miau, J. J.** *See* Wu, Miau, Hu & Chou

**Michelin, S.** *See* Sipp, Fabre, Michelin & Jacquin

**Puthenveettil, B. A., Ananthakrishna, G. & Arakeri, J. H.** The multifractal nature of plume structure in high-Rayleigh-number convection, 245–256

**Riera, C. S.** *See* Coullet, Mahadevan & Riera

**Roach, D. C.** *See* Holloway, Roach & Akbary

**Rodi, W.** *See* Fröhlich, Mellen, Rodi, Temmerman & Leschziner

**Sheard, G. J., Hourigan, K. & Thompson, M. C.** Computations of the drag coefficients for low-Reynolds-number flow past rings, 257–275
